

NEW ZENDO
UPDATE

very general

Site planning
September 2012

During our recent stay at Tahoma we were able to move ahead several paces

In the development of the new zendo.

With the addition of the necessary larger pump, the upgraded septic system will be now up to code.

With the huge continued fine

help of Ross Chapin we tuning .

We walked the land with the Roshi and settled the relationship between the Hondo which will be built much later and the zendo which we are working on now. The diagram above is a rough sketch of this relationship.

Following the sesshin at Tahoma we went to Los Angeles and did a kosesshin at Tanden Zendo there, during that time a very successful demonstration, exhibition and sale of Roshi's calligraphies brought new karmic affiliations and some added funds for building.
